DEDICATION

It is with great pride and honor that we the class of 1970 dedicate REMINISCENTIAE to you, Mr. McCabe. As we survey our past three years at Norwalk High School, we remember the innumerable times when, through your hard work, our studies have been highlighted and our educational opportunities enhanced.

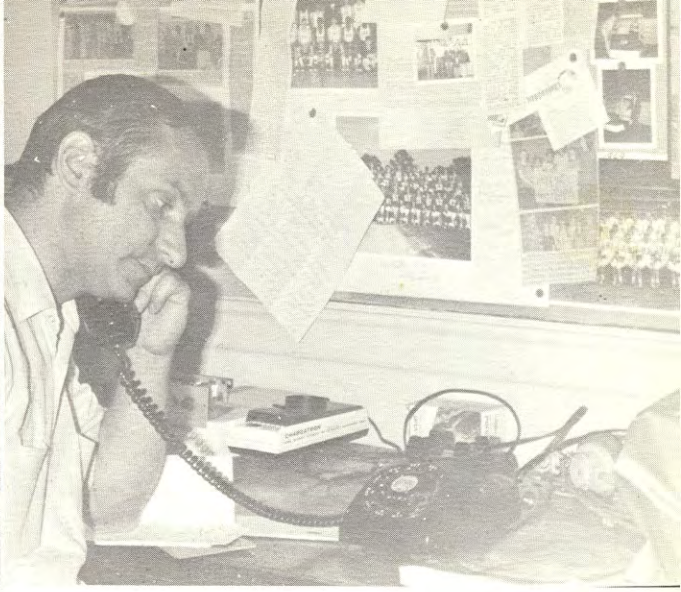

Your help with films, records, overheads, lighting effects at our plays, assemblies, and concerts, and public address systems at our athletic and cultural events has truly been invaluable.

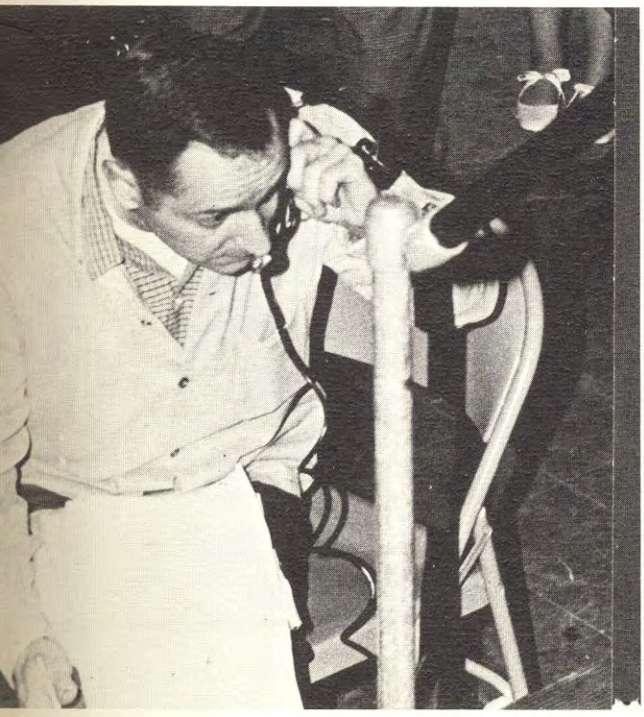

More than this, Mr. McCabe, we remember your trusting and easy-going nature, your marvelous sense of humor, and your willingness to stand by us in our most difficult situations.

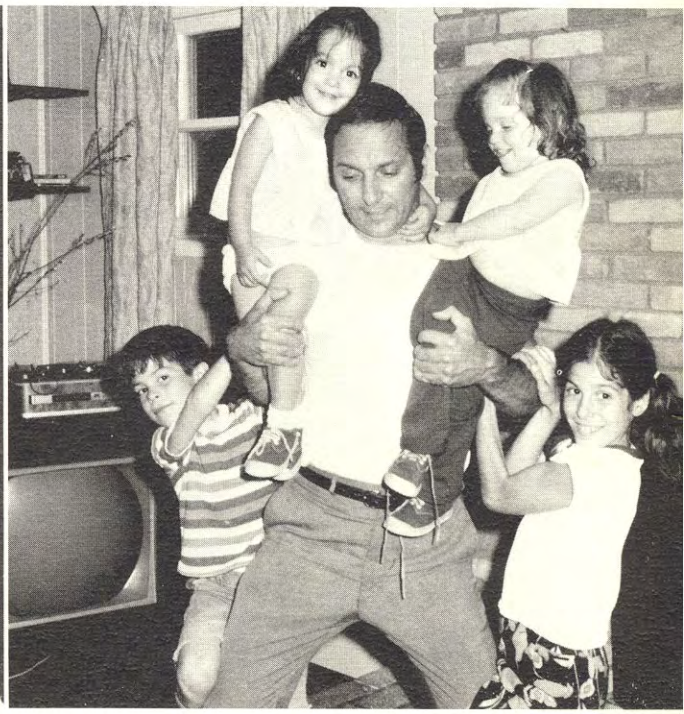

In our high school careers we have been influenced by many different factors. Your work has increased our audio and visual sensibilities and, hence, has enabled us to communicate our own ideas better.

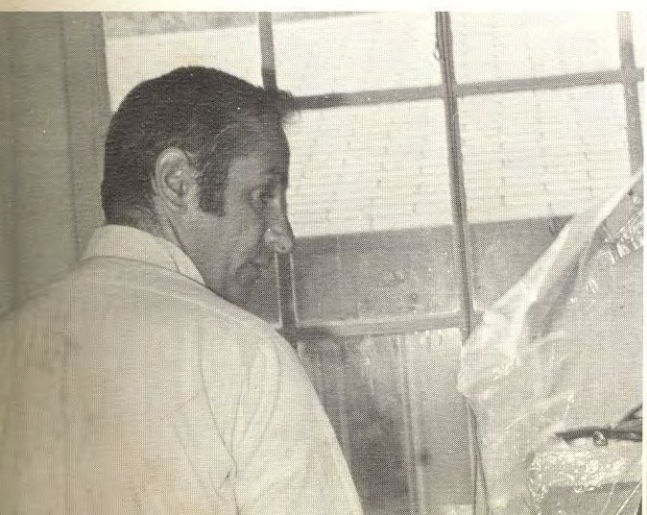

We know that you will go on to guide and inspire many students. As seniors leaving Norwalk High School, we bring with us many fond memories which you have helped to create. We can only hope your memories of us will be as fond.

In watching, to see clearly;
In listening, to hear distinctly;
In all things, to conceive of truth;
In excellence, humility;
In misfortune, nobility;
In living, to love.

Richard Thornburg

To: The Class of 1970 - Norwalk High School
From: William A. Moore, Principal

I am proud of you. I am grateful to you. You, the Class of 1970, make me very optimistic.

Your academic achievements, your contributions in the areas of music, arts and crafts, your service to the school and community, your participation in athletics and record of sportsmanship, your really positive approach to life and education - all this makes you outstanding.

Though I've known most of you for three years, you are my first official graduating class. Your cooperative efforts and your loyalty to our school have contributed to making your last year a memorable one for all of us. I personally want to thank all of you for your aid in a very important and trying year. You are great.

All that is left is time worn advice. Stand fast to your ideals and keep up the good work. I know you will. Congratulations to the Class of 1970 and again Many Thanks.

Sincerely,

W. M. Moore

William A. Moore
Principal

AVE ATQUE VALE

Nineteen-hundred-and-seventy was a year of transition for the Norwalk High School Family. Changes in the Administration affected the attitude and behavior of the entire community. To take charge of a school after it has been led for so many years by such a warm and talented administrator as Mr. Malmquist would ordinarily be an enormous task. We feel that Mr. Moore has met the challenge.

In this, his first year as principal, Mr. Moore has gained the respect and confidence of the entire school. Time and again he has shown the kind of progressive leadership which has encouraged growth and diversification of interests within the family.

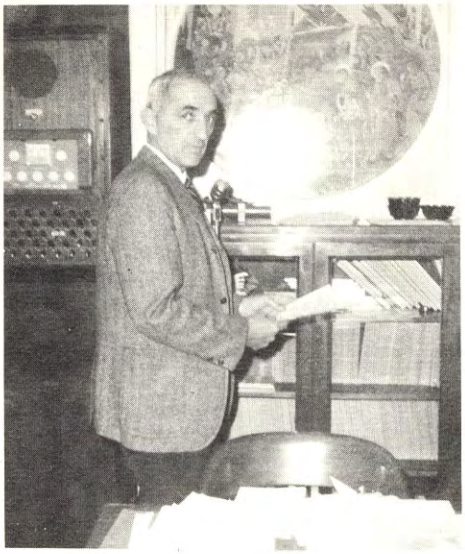

Mr. Gilmore has also changed roles. Promoted from the position of head chemistry professor, he has taken charge as an effective and efficient Administrative Assistant. His decisive intellect and judicious discretion have helped to cultivate understanding between office and student.

We as graduating seniors would like to deliver an "Ave atque Value", Hail and Farewell to the men who have helped us through our last year in high school with patient understanding and vital leadership.

YOURSELF

A wise choice of subjects is based on your honest self-appraisal. Occasionally, extreme changes in a student's work do occur, but generally the record continues in a consistent fashion. Steady improvement is always possible through good work habits. You know your strengths and weaknesses; cultivate your strengths and strengthen your weaknesses. Academic success in school may be enhanced if you make your subject selections with the following in mind:

1. What programs of study are best for me in light of my overall scholastic achievement?
2. What are my capabilities and in what areas am I weak?
3. What are my interests?
4. What are my educational plans through high school and beyond?
5. Are my selections well balanced between academic subjects and special interest areas (Home Ec-Industrial Arts-Fine Arts and Music)?

In youth my wings were strong and tireless,
But I did not know the mountains.
In age I knew the mountains
But my weary wings could not follow my vision.
Genius is wisdom and youth.

I WHO kept the greenhouse,
Lover of trees and flowers,
Oft in life saw this umbrageous elm,
Measuring its generous branches with my eye,
And listened to its rejoicing leaves
Lovingly patting each other
With sweet aeolian whispers.
And well they might:
For the roots had grown so wide and deep
That the soil of the hill could not withhold
Aught of its virtue, enriched by rain,
And warmed by the sun;
But yielded it all to the thrifty roots,
Through which it was drawn and whirled
to the trunk,
And thence to the branches, and into the leaves,
Where from the breeze took life and sang.
Now I, an under-tenant of the earth, can see
That the branches of a tree
Spread no wider than its roots.
And how shall the soul of a man
Be larger than the life he has lived?
